Open Access

Open Access (OA) is an important way to make research findings freely available for anyone to access and view. We support both Gold and Green OA in our books and journals programme.

- More than 92% of our journals now accept OA submissions
- We have published over 80 OA books and 13 OA Elements
- Cambridge Core features OA research by authors from over 70 countries

As part of our commitment to help build an open future, we have signed a number of Open Access agreements across the globe, providing researchers from over 745 institutions with a pathway to publish OA at no cost. We also support cOAlition S's transformative journals initiative and have now submitted over half of our full list to the programme, including all 118 hybrid journals that we own.
